Web applications projects.

I've worked on numerous projects over the years, but these are the ones that I'm most proud of.

Best Agent

Uber for Estate Agents. Property buyers and sellers can rate estate agents.

🔗 https://bestagent.co.za

BankyStatement

Simplify your finances.

🔗 https://bankystatement.com

BAS

A Business Automation System. Super easy quoting and invoicing.

🔗 http://bas.fintechsystems.net

BIS

A Business Information and CRM System for leads processing. Designed to integrate with WordPress and capture 100s of leads on a daily basis across numerous websites.

🔗

Backup Dashboard

Fintech Shop

Software as a service to consolidate backup reports from multiple vendors. Supports cPanel, Virtualmin and numerous other backup systems.

🔗 https://backupdashboard.com

The quickest way to add items to a cart. Think Point of Sale intersecting with a shopping cart.

🔗 https://shopdemo.fintechsystems.net

YouCanDoMaths

We took over this Laravel project from development agencies that could no longer deliver the service.

🔗 https://youcandomaths.co.za

YouCanDoScience

The companion site for YouCanDoMaths.

🔗 https://youcandoscience.co.za

WhatsApp Slack

An API that enables WhatsApp teamwork in Slack. Ideal for keeping on top of customer services requested initiated via WhatsApp but serviced by any team member out of Slack.
